ABOUT ME

I am a software engineering student with an interest in software development and creating functional, intuitive, and user-centered digital solutions. I enjoy learning new technologies and strengthening my skills through hands-on projects and ongoing training.

I am currently focusing on programming, web development, databases, and interface design, with the goal of building high-quality applications and growing professionally as a software developer. I am known for my curiosity, ability to learn, and commitment to continuous improvement.

SOFT SKILLS

Rapid Learning

Adaptability to new technologies

Effective Communication

Analytical Thinking

Teamwork

Curiosity about technological research

[ASabinoAcosta](#)

EDUCATION

Software Engineering (currently)

Universidad Domínico Americano

High School Diploma in Mathematics and Technology

Ministry of Education of the Dominican Republic

RELEVANT COURSES

Designing User Interfaces and User Experiences (UI/UX)

IBM

Python Especialization

University of Michigan

Advanced Python

EducaciónIT

Object Oriented Programming

EducaciónIT

Introduction to databases and SQL

EducaciónIT

TECHNICAL PROJECTS

Personal Web Portfolio

- Development of a personal portfolio website focused on showcasing projects, technical skills, and experience, applying principles of web design, responsive layout, and visual organization.

HTML

css

JavaScript

Medical Management Application (in development)

- Design and development of a desktop application focused on patient management, using Python and databases, with a focus on interface design, data entry, and the overall structure of the system.

Python

SQL

Django

Library Management System (Under Development)

- Development of an application for managing books, users, and loans. It is currently being migrated from a console-based version to a graphical interface using Flet, incorporating data persistence, modular architecture, and API integration to expand its functionality.

Python

Flet

FastAPI

SQL

Messaging app

- Design and development of a desktop application focused on using the WhatsApp API to create a small, minimalist messaging tab.
